

... the new company

... Stock / Workshop

History

In 1996 BAUM set, for the first time, foot on the Belgium and Dutch market with an agency in the Netherlands. This happened on initiative of Mr. Dries van den Nouwelant, who, at that time, had already approx. 18 years of experience with PTFE-lined piping systems.

After four years and a growing market, the BAUM product was too intensive to handle it just as a side product of the agency. The best solution and conclusion was to found a new daughter company for the Benelux market under the direct supervision of Mr. Markus Baum and with Dries and Arianne as sales team.

Now, eight years later, BAUM BENELUX BV, has an important place on the market of lined piping systems which asks for a new and improved set-up. In order to achieve a high customer satisfaction, BAUM BENELUX started a service workshop. A new building with a larger office and a work floor at the J.F. Vlekkeweg 8-01 in Tilburg has been equipped and gives us the necessary flexibility, specially in case of special solutions and quick satisfy of customer's requirements concerning delivery time.

With a lot of expertise, experience and enthusiasm, we are sure that BAUM BENELUX BV will be a reliable partner with much more possibilities for the future.

The „Oranje“ Team

Arianne

In 1982, she started her career as executive secretary with Peabody Doré. (at that time, the only producer of PTFE/PFA-lined pipe systems in the Netherlands)

Technical sales and customer contacts became more and more interesting to her, and after one year, she changed to the Sales Departement of the company.

In 2001, she accepted the new challenge to work with BAUM in the Netherlands. Many years of professional and international experience, as well as her knowledge of products and customers make her the ideal support for BAUM BENELUX.

Dries

In 1979, he started as welder with Peabody Doré in the Netherlands.

In 1988, Peabody was sold to a French company and a few years later, Dries' ambition concentrated more on technical sales. Years later, he became manager for a piping company in Rotterdam where he got in contact with Baum Kunststoffe. This was in 1996. The high technical standard, possibilities for innovation and the atmosphere at BAUM were very important to him. So, in 2000 BAUM BENELUX BV was founded.

Now 13 years and many projects later, a new chapter for BAUM BENELUX began. Since September 2008, BAUM BENELUX has a fully equipped workshop for small projects, make-up spools, added with a balanced stock.

Erhan

Since September 2008, Mr. Erhan Coban, is responsible for the production at the service workshop at BAUM BENELUX BV.

More than 5 years of experience with fluoroplastics makes him the best candidate for this job. At the moment, his knowledge is extended by internal and external training.

In order to get in closer contact with the production, as well as with the administration, he already spent some weeks at BAUM's headquarter in Germany, .

Stock

In order to be able to react quickly to urgent needs, BAUM BENELUX built up a stock with DIN and ANSI parts. This stock is adjusted regularly. For own production there are, of course, the necessary raw materials available (pipes, flanges and liner for diameters up to DN 150 / 6"). The liner stock is from BAUM Germany's production (paste extruded liner).

Workshop

The new workshop has a floor space of 250 m², equipped with all the necessary equipment for spool production: machinery for the steel works (saw, welding device, sand blasting), as well as for lining (pulling beam, flaring machines). Painting can be done as well. All this equipment can be also used to manufacture similar parts, such as hoses etc.

... This & That

Summer Party 2008

Last July, as in the past years, we celebrated, once again, our summer party.

This time the special highlight of the summer party was the performance of a magician. For the pleasure of our little guests, he made funny figures out of balloons and he amazed us all with his marvelous conjuring tricks.

After we enjoyed the rich buffet, Mr. Stumpe came up with another big surprise. He made his quad-bike (ATV) available for joyrides – a great pleasure for all.

Unfortunately, we were overtaken by a heavy rain shower. This, however, did not prevent us from continuing the party indoors.

BAUM KUNSTSTOFFE GMBH congratulates to their working anniversary and says thank you:

20 years with the company

Mr. Walter Wieland 18.04.2008

10 years with the company

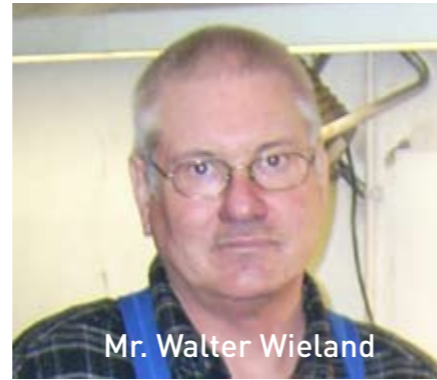

Mr. Waldemar Martinenko 09.02.2008

Mr. Juri Ignatov 24.02.2008

Mr. Dimitrij Rtiscev 16.03.2008

Mr. Martin Sattler 01.08.2008

Mr. Eugen Breininger 01.10.2008

Mr. Walter Wieland

Mr. Martin Sattler

Mr. Eugen Breininger

Mr. Juri Ignatov

Mr. Dimitrij Rtiscev

ACHEMA 2009
Frankfurt am Main/Germany

BAUM INSIDE

Welkom bij BAUM BENELUX BV

Editorial

Dear customer, dear business partner,

We would like to thank you for all your support, trust and business throughout a very successful year 2008. After a very good year 2007, we've been able to develop our company once again – thanks to all of you.

The biggest step forward in 2008 was indeed our new factory in Tilburg / Netherlands, which now includes an own workshop. With this edition of "Baum Inside", we would like to introduce the new "BAUM Benelux" in details to you.

In spite of all bad forecasts for the econo-

my in 2009, in all parts of the world, we are looking very positive into the future. We are planning to develop our business further – we are very sure that we will be a stable and reliable partner for you. The next expansion steps are already in planning (we will report in the next edition of "Baum Inside"), and we will increase our service capabilities for you furthermore.

We are hoping for a successful year for all of you and will support you as best as we can !

Yours sincerely
Markus Baum

Autumn last year, BAUM BENELUX BV moved into a new facility in Tilburg. The very new part now is our own 250 m² workshop with all necessary equipment to produce PTFE-lined pipes, hoses etc. This will allow us, not only to produce closing spools for projects, but also to independently fulfil small size orders directly from the Netherlands. Consequently, we also needed additional working staff. From all this, we expect quicker reaction and delivery times for our local customers. We would like to introduce details on the following pages:
